Re: Endorsement and Recommendation – Frank McGann

As an attorney specializing in high-profile criminal cases and accident litigation for over thirty years in California, I'm pleased to, and enthusiastically do, endorse the wide-based forensic photography talents of Frank McGann.

I have utilized his services extensively in both civil and criminal cases with great success.

He does excellent work in photo studies demonstrating catastrophic to barely discernable injuries to their maximum effect and potential.

He's outstanding in accident scene ground-level and aerial photography; and his studio and field photography are equally excellent.

Frank's work has helped me clear up liability issues in various types of cases, and assisted me in graphically portraying injuries as well as most vividly demonstrating their severity in personal injury cases.

Frank is knowledgeable of his profession, has excellent credentials, and is a very credible and easy to qualify expert witness with a low-key, confident style and demeanor that adds to his witness credibility on the stand.

I give him much credit for several of my best settlements and verdicts in civil and criminal cases.

He understands legal guidelines and time of the essence requirements of litigation.

Sincerely,

Gary Dunlap, Attorney
